

## **2017 Children and Youth with Special Health Care Needs Quality Improvement Projects**

### **Medical Home Project**

**Seven tribal health center teams working to strengthen communication between primary care teams and Birth to 3 Programs, promote family understanding of how to partner with their child's care team, and the early identification of children with developmental delays or behavioral health challenges.**

- Bad River Tribal Health Center, Ashland
- Gerald L. Ignace Indian Health Center, Milwaukee
- Lac Courte Oreilles Community Health Center, Hayward
- Menominee Tribal Clinic, Keshena
- Red Cliff Community Health Center, Bayfield
- Saint Croix Tribal Health Center, Webster
- Stockbridge-Munsee Health and Wellness Center, Bowler

### **Shared Plans of Care Project**

**Four care teams working to implement care plans for children with chronic conditions developed jointly with families, track non-reimbursed care coordination activities, and promote family engagement in health care quality improvement efforts.**

- Children's Hospital of Wisconsin-Special Needs Program, Milwaukee
- Menominee Tribal Clinic, Keshena
- Partnership Community Health Center, Appleton
- Prevea Health-Rheumatology Clinic, Green Bay

### **Youth Health Transition Project**

**Five care teams working to promote planned transitions of care for youth with chronic conditions from pediatric to adult health care through policy development, youth and family education, and clinician engagement.**

- Children's Hospital of Wisconsin-Transplant, Milwaukee
  - Children's Hospital of Wisconsin-Rheumatology Clinic, Fox Valley
  - Gundersen Health System-General Pediatrics, La Crosse
  - University of Wisconsin Health-Department of Pediatrics, Primary Care, Madison
  - Ho-Chunk Tribal Health Center, Baraboo and Black River
